

Fluid Catalytic Cracking Units (FCCU) require refractories to provide thermal insulation and erosion resistance. This includes the vessel walls, cyclones, transfer lines, grids, risers, and flue gas lines. Allied Mineral Products supplies refractory monolithics required for every aspect in a FCCU. These versatile products can be installed by hand packing, casting, gunning, shotcreting, and self-flow. Fast firing products are available, allowing for reduced turnaround time.

### Extreme Abrasion

PETROMAX® 91 HP

PETROMAX® 91 SF

PETROMAX® RAM 184

### Seal Pots / Loops

PETROMAX® 110 C

PETROMAX® 110 G

PETROMAX® SHOT FSM

PETROMAX® TUFF FS

### Repair / Coating Materials

PETROMAX® KOTE 70

PETROMAX® KOTE 90

PETROMAX® CAST 26 TR

### Thermal Insulating

PETROMAX® 2450

PETROMAX® 2570

PETROMAX® 550 LT

PETROMAX® 800 HS

PETROMAX® FAST 700 LT

PETROMAX® PUMP 60 LI

PETROMAX® PUMP 80 LI

### Abrasion Resistant & Thermal Insulating

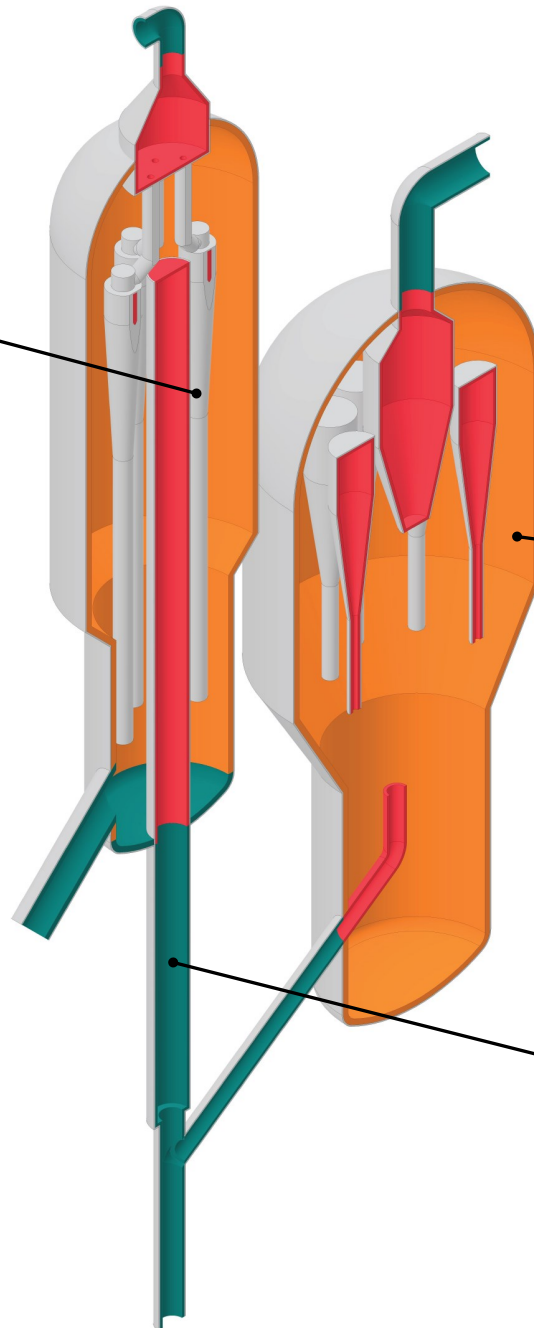

PETROMAX® 50 G

PETROMAX® 85 G

PETROMAX® 110 C

PETROMAX® 110 G

PETROMAX® TUFF FS

Global **Refractory** Solutions
