

Blast Furnace Taphole Clay

Product Family	Products	Description
ALPHA TAP RESTORATION CLAY	ALPHA TAP RESTORATION CLAY PLUS ALPHA TAP RESTORATION CLAY - HI ALPHA TAP RESTORATION CLAY ALPHA TAP RESTORATION CLAY 6	Specifically designed to fill cracks and fissures in taphole clay column. Material combines series of fine grained aggregates with a proprietary blend of carbides providing an excellent, effective taphole repair solution.
ALPHA TAP	ALPHA TAP 963-14 ALPHA TAP 1170R MOD-4 ALPHA TAP 1170R-AM ALPHA TAP 1170R-2E	Anhydrous special blend of refractory aggregates with a high-performance blend of select carbon-based binders to create a robust bond phase. User-friendly product combining performance and cost effectiveness.
GREEN TAP RESTORATION CLAY	GREEN TAP RESTORATION CLAY	Formulated to fill in the cracks and fissures. High alumina clay fortified with silicon carbide for effective taphole repair.
GREEN TAP	GREEN TAP 3 GREEN TAP D GREEN TAP 5 GREEN TAP ET GREEN TAP M	More environmentally friendly than similar products. Includes a hybrid bond phase providing higher strengths throughout the useful temperature range for blast furnaces up to 7,000 TPD.
TERRA TAP	TERRA TAP	Hybrid bonded taphole clay. A superior environmentally clean clay compared to similar products with tar or petroleum-based bond systems.
