

## INGATES / DUCK FEET

ICP Ingates / Duck Feet are specialized components used at casting ingates to improve metal flow and protect mold surfaces. Engineered to reduce erosion on cores and molds, they promote a smoother, more controlled metal feed into the mold, effectively minimizing turbulence. Their sharp-edged design also ensures a cleaner break at the ingate, resulting in a superior casting finish. ICP Ingates / Duck Feet are available in both mullite and fused silica compositions. Samples are available upon request for evaluation and testing.

**The ICP Advantage**

- Made in the USA
- ISO Certified
- Premium Materials
- Lighter Weight Technologies
- Custom Options
- Fast Delivery Times
- New Technologies

**Benefits of the products**

- Minimizes hot tearing
- Erosion reduction
- Better casting finishes
- Fewer inclusions
- Less gate grinding

**Applications of the products**

- Casting Ingates

Global **Refractory** Solutions
