

GEMCAST MANUFACTURING INC.

CUSTOM REFRACTORY SOLUTIONS

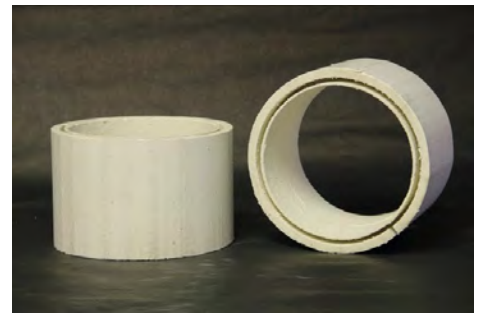

Global **Refractory** Solutions

VACUUM FORMED PRODUCTS

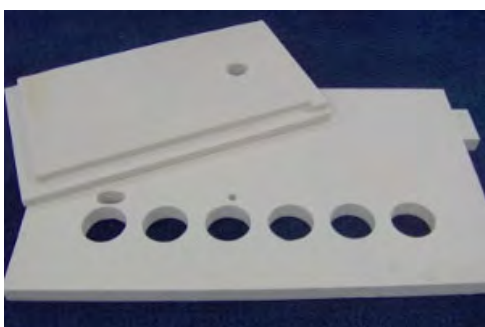

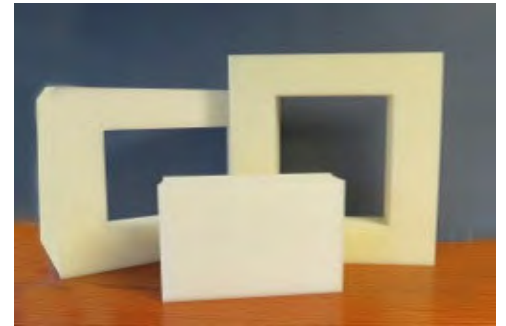

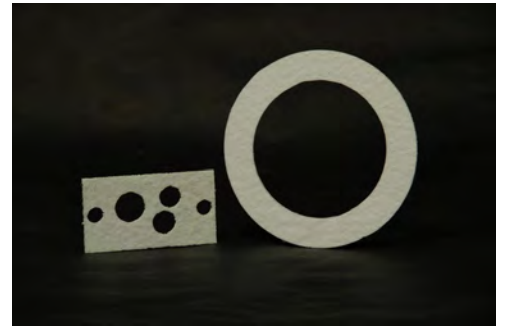

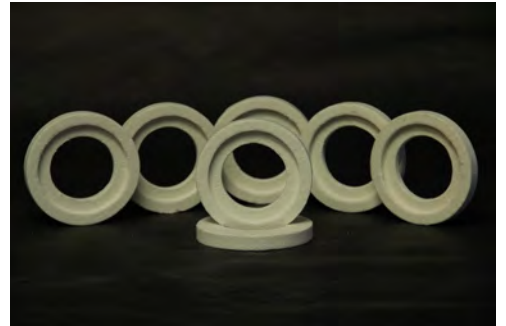

Quick and efficient vacuum shape solutions.

GEMCAST manufactures vacuum formed shapes and boards in a variety of shapes, sizes, thicknesses and densities. Our team of experts can create custom designed solutions that are manufactured in-house and sent directly to customers.

Custom Designs

GEMCAST manufactures gaskets and other custom pieces from a variety of materials including rubber, soluble fiber, ceramic fiber and more.

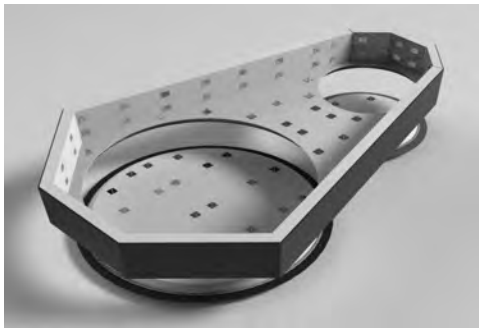

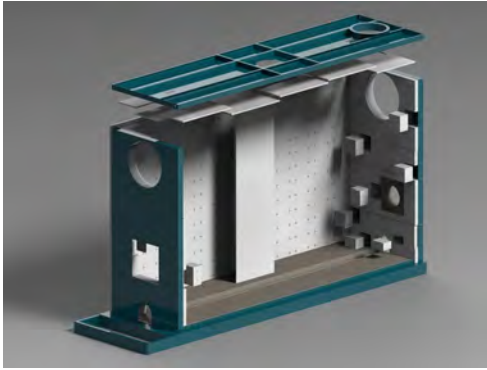

SOLUBLE & CERAMIC FIBER PRODUCTS

Custom solutions for easier installations.

GEMCAST offers soluble and ceramic fiber blankets, papers, ropes and modules in a variety of thicknesses, roll sizes, densities and shapes. Custom folded modules are available.

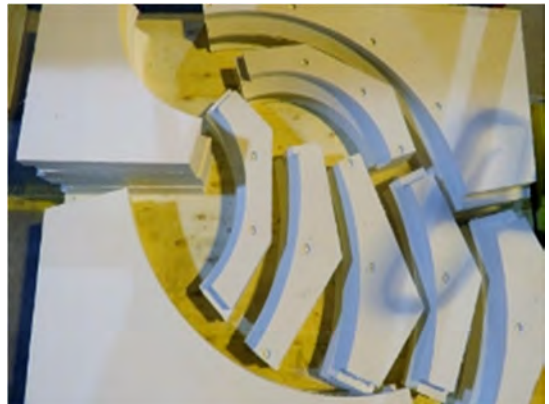

The right tools for unique solutions.

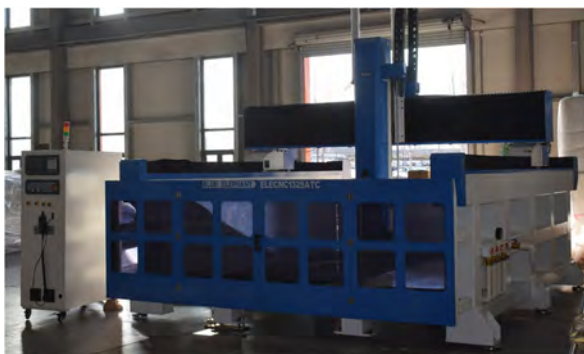

GEMCAST's ability to create custom refractory designs comes from the investment in quality equipment.

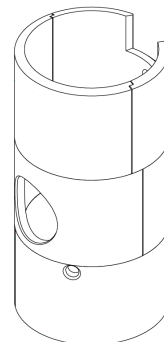

CNC Cutting Unit

Waterjet Cutting

Four Axis Cutting Unit

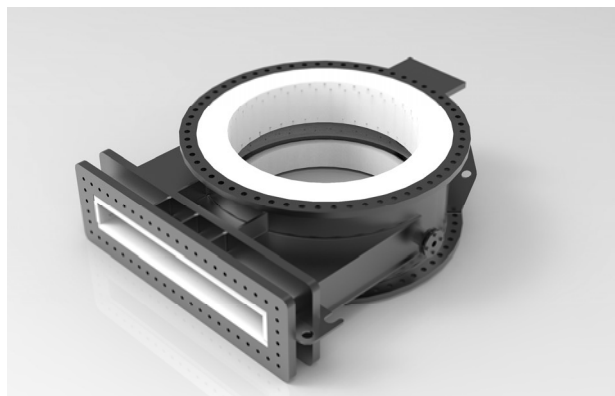

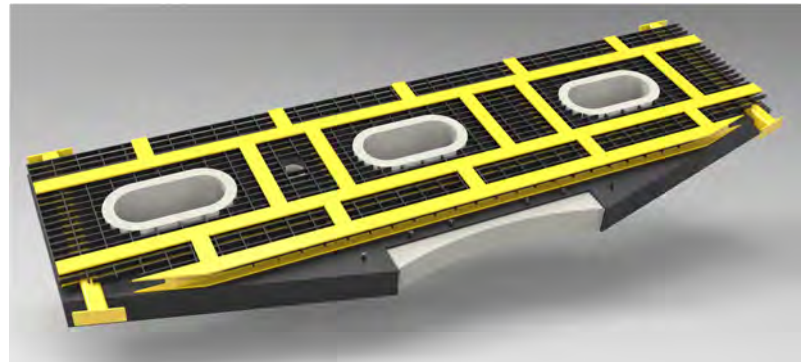

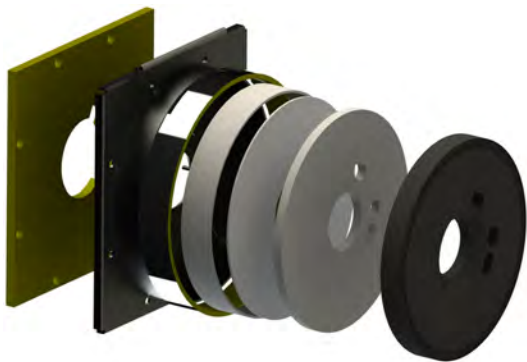

Ready-made kits for easier installations.

GEMCAST can help streamline your purchasing and installation procedures by offering custom kits with instructions and parts to help reduce installation time.

Engineering Support

From design and manufacture to installation and repair, our professional staff and engineers can take care of it from beginning to end.

A partnership built on solutions.

Beginning with a simple customer appeal; “to partner with a company to innovate refractory solutions to meet lean manufacturing needs”, over 25 years ago a dedicated team of professionals took this request and formed GEMCAST.

From there, the team has worked tirelessly, growing and evolving the company, providing original and novel approaches to assist customers. Through dedication and hard work, GEMCAST has become a market leader in refractory solutions and continues to provide and support innovative concepts for the industry.

In April 2024, GEMCAST was acquired by ALLIED MINERAL PRODUCTS, a global leader in the manufacturer of monolithic refractories and precast shapes. The acquisition allows Allied to have a manufacturing presence in Canada and adopt new lines of business through GEMCAST’s industry-leading vacuum-formed products, fiber gaskets and precast shapes.
