

Fluid Catalytic Cracking Units (FCCU) require refractories to provide thermal insulation and erosion resistance. This includes the vessel walls, cyclones, transfer lines, grids, risers, and flue gas lines. Allied Mineral Products supplies refractory monolithics required for every aspect in a FCCU. These versatile products can be installed by hand packing, casting, gunning, shotcreting, and self-flow. Fast firing products are available, allowing for reduced turnaround time.

**Transfer Lines, Wye Sections, and Overhead Lines - Abrasion Resistant & Thermal Insulating**

ACTCHEM® 45VS/45TF

PETROMAX® ABR/ABR G

PETROMAX® 110 C

PETROMAX® 110 G

PETROMAX® FS G

PETROMAX® FAST 50

PETROMAX® FAST 50 G

PETROMAX® 85 G

PETROMAX® FAST 32 SA

PETROMAX® FLO FS

**Seal Pots / Loops**

PETROMAX® FLO FS

PETROMAX® FS G

**Cyclones, Air Distributors, and Hot Wall Internals - Extreme Abrasion Resistant**

ACTCHEM® 85

**Vessel Linings - Thermal Insulating**

PETROMAX® FAST 600 LT

PETROMAX® LT HS

PETROMAX® 2890 G

PETROMAX® PUMP 80 LI

**Repair Materials**

ACTCHEM® 85FG

PETROMAX® 110HP
